

**LUCAS GODOY GARRAZA**  
[godoygarraza@gmail.com](mailto:godoygarraza@gmail.com) | <https://lucas-gg.github.io>

## EDUCATION

**Ph.D. Biostatistics**, University of Massachusetts Amherst, 2025

Dissertation: *Approaches to causal inference using Bayesian machine learning and nonparametric methods with applications to the assessment of effects of family planning programming.*

Advisor: Leontine Alkema

**M.A. Quantitative Methods in the Social Sciences**, Columbia University, 2007

**M.A. Public Policy and Management**, Universidad de Chile, Santiago, Chile, 2000

**B.A. Political Science**, Universidad del Salvador, Buenos Aires, Argentina, 1997

## RESEARCH INTERESTS

Causal inference for policy evaluation; endogeneity and effect heterogeneity; staggered adoption and quasi-experimental designs; interpretation of local effects and transportability; Bayesian and machine-learning-based methods.

## STATISTICAL SOFTWARE

`princeBART` — R package for instrumental variable and encouragement designs with noncompliance, providing Bayesian estimation of complier-specific causal effects, effect heterogeneity, and tools for assessing and implementing generalization to external populations under explicit transportability assumptions, including sensitivity analyses. [https://alkemalab.github.io/prince\\_BART/](https://alkemalab.github.io/prince_BART/)

## GRANTS & FUNDED RESEARCH

**National Institute of Mental Health (R03MH123905)**, *Assessing the Impact of a Youth Suicide Prevention Program in Small Communities*, PI: Christine Walrath - Project statistician

- Led statistical analysis for evaluation of a youth suicide prevention program using observational and quasi-experimental methods.

**Bill & Melinda Gates Foundation (OPP10709004; INV-00844)**, PI: Leontine Alkema - Doctoral researcher; analysis lead for dissertation chapter

- Supported methodological and applied research on facility-level performance evaluation, resulting in a peer-reviewed publication.

**Bill & Melinda Gates Foundation (INV-018349) and Children's Investment Fund Foundation (2012-05769), *Family Planning Impact Consortium*** (Grant recipient: Guttmacher Institute); Project lead: Leontine Alkema - Doctoral researcher

- Contributed to methodological development and analysis for research on the causal effects of family planning programs, resulting in a manuscript under revise-and-resubmit at Statistics and Public Policy.

## **AWARDS & FELLOWSHIPS**

- Dean's Dissertation Completion Fellowship, University of Massachusetts Amherst, 2024
- Dean's Ph.D. Fellowship, School of Public Health and Health Sciences, University of Massachusetts Amherst, 2021–2023
- Premio ISALUD en Economía y Salud, Fundación ISALUD, Buenos Aires, 2004 (ISALUD Award in Health Economics)
- Distinción Máxima, Master's in Public Policy, Universidad de Chile, 2000 (Highest Distinction)
- Diploma de Honor, BA in Political Science, Universidad del Salvador, Buenos Aires, 1997 (Honors Diploma)

## **ACADEMIC RESEARCH AND TEACHING EXPERIENCE**

**Research Assistant** — Alkema Lab, University of Massachusetts Amherst, 2022–2024

- Developed causal inference methods for observational and quasi-experimental studies, with emphasis on endogeneity, effect heterogeneity, and interpretation of local effects.

**Research Assistant** — Balzer Lab, University of Massachusetts Amherst, 2021–2022

- Contributed to methodological research on causal machine learning and doubly robust estimation using flexible prediction models.

**Teaching Assistant** — Special Topics in Causal Inference, University of Massachusetts Amherst, 2022

## **PROFESSIONAL RESEARCH EXPERIENCE**

### **Statistical Consultant** — ICF, 2014–*Present*

Selected consulting engagements: UNFPA; Avenir Health; Aptive

- Conduct methodological and applied research for large-scale health policy and program evaluations using observational and quasi-experimental data, including national suicide prevention initiatives, family planning programs, and federal and state public health policies (SAMHSA, CDC, NIH).
- Develop and implement causal inference and machine-learning-based methods, including flexible outcome models and design-informed analyses.
- Lead statistical analysis plans and contribute to peer-reviewed manuscripts, policy reports, and methodological documentation, with an emphasis on reproducibility.

### **Senior Technical Specialist** — ICF, New York, USA, 2007–2014

- Led quantitative and methodological components of health research projects, with responsibility for study design, causal analysis, and interpretation.
- Mentored analysts in statistical programming and causal inference workflows, including reproducible analysis in R.

### **Earlier Research and Policy Roles**, 1998–2009

- Research and statistical roles in academic and government settings, including the HOPE Program and the Ministries of Health and Economy (Argentina), focused on survey analysis, administrative data, and policy-relevant evaluation.
